

Natural Driftwood Sculptures

The Driftwood Garden Pavilion

The Driftwood Garden Pavilion

is constructed entirely from recovered Western Red Cedar that NDS source from the same lake as Natural Driftwood Sculptures. Straight driftwood logs are sawn at our lakeside yard to create the structural members and the smooth planking machined at a local joinery facility. The weathered driftwood cladding is prepared from selected fencing planks.

As Western Red Cedar contains natural preservatives the prolonged natural seasoning process means that NDS recovered cedar is just as sound on the day it was felled and even more attractive. All timber collected by NDS is certified under the SmartWood Rediscovered accreditation.

NDS Driftwood Garden Pavilions are made to order and will be lined internally below windowsill level with planed or weathered cedar cladding to customer choice. Sectional cedar floors can be supplied as an option extra.

Standard Specification of Construction.

Standard specifications: 2.5m x 3m

Walls, door, windows and roof structure:

NDS Recovered Western Red Cedar

Roof Covering:

NDS Recovered Western Red Cedar shakes

Internal Lining:

NDS Recovered T & G Red Cedar Boarding

Glazing:

Double glazed units

Fixtures:

Stainless steel door and window ironmongery.

Size:

3metres x 2.5metres

We can manufacture any size of Pavilion to suit your requirements. Price on application.

Natural Driftwood Sculptures

Product Information

Distinctly Canadian and Simply Unique

All our Driftwood products originate from the same sustainable source as our sculptures. They have the same natural preservatives, making them more resistant to decay and prolonging their ability to withstand attack by insects. In addition, all NDS' products are certified SmartWood Rediscovered, which guarantees that they come from a sustainable source.

Decking

A new product made from our recovered cedar. It is of a high quality, aesthetically pleasing but because it is produced from the waste timber recovered from the lakes of Canada, it is very eco-friendly. Our standard sections are as follows:

P.A.R. Cedar Deck 25mm x 90mm in section £ 3.05/metre (~~€4.24~~)

P.A.R. Cedar Deck 25mm x 140mm in section £ 4.80/metre (~~€6.67~~)

Any special section or one off projects can be made to order.

Hand-split Shakes (Cedar Roof Tiles)

This traditional roofing material used extensively throughout Canada and North America is now available from Natural Driftwood Sculptures, offering a wonderful, soft, textured look to any roof.

£ 25/square metre (~~€34.75~~)

Fencing

By using regularised pieces of cedar driftwood, we are able to offer a unique and sustainable product that looks stunning. This type of fencing is best suited to a post and rail system and once fixed in position requires no further maintenance, thus creating a natural and aesthetically pleasing screen, which the sun bleaches to an attractive silver finish.

The fencing is sold by the linear metre at a standard height of 8 feet. £ 125.00/ linear metre (~~€173.75~~)
